Java Enabled Web Browsers

Solution:

To verify that your computer's Java version is current and enabled, please follow the instructions below that are relevant to your computer:
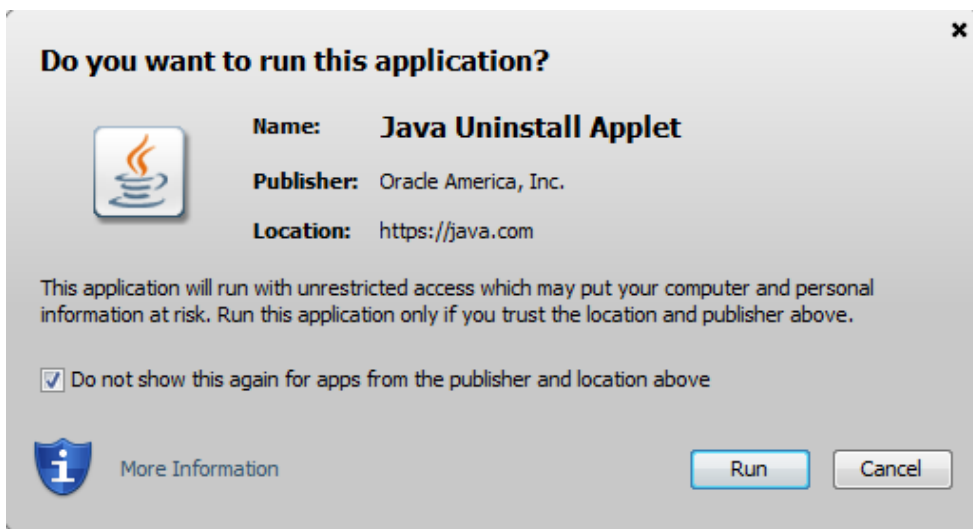

Java for Windows/Mac:

Test Installation
To test that Java is installed and working properly on your computer, run the following: ***[test the currently installed version of Java](#)***".

** If you get a "Security Warning" pop-up window asking "Do you trust java.com" – select "Allow" as well as checking the box "Remember this action…".

If you get a pop-up window that looks like this please select "Run" button.
