# July Monthly D2L Update Notification

D2L/Brightspace Learning Environment 10.7.3

HTML Editor – Paste from Microsoft Office Word

Currently, every time a user copies and pastes any Microsoft Word content into the HTML Editor, a pop-up window appears prompting the user to either select Remove Formatting or Keep Formatting of the pasted content.
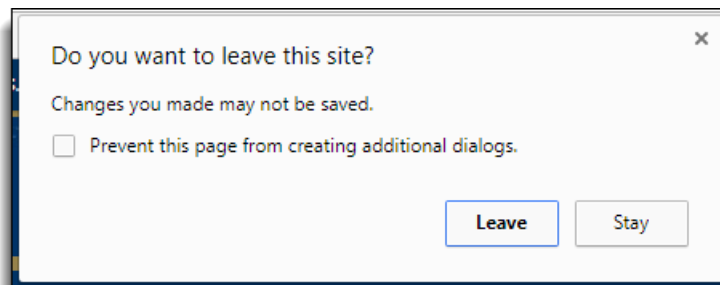

- Copy and Paste into any HTML Editor in D2L
- Select Remove or Keep Fomatting

HTML Editor - Unsaved Changes Prompt

In the HTML Editor tool, when you make content changes and attempt to navigate away or close the browser or tab without saving your changes, a message prompts you to discard your changes or resume editing. This feature is deployed in the following locations:

- Content > Create/edit an HTML file
- Discussions (in reading view) > Post a discussion topic/reply to a discussion topic
- Announcements > Create/edit announcements

Quizzes – Shuffle the Order of Questions

To discourage cheating in quizzes, instructors can now shuffle the order of all questions in quizzes or specific groups of questions (sections) in quizzes. For example, an instructor could shuffle questions 1-10 in a quiz, or shuffle questions 3-10 (grouping those questions into a section) and retain the order of questions 1-2 at the start of the quiz.

1. When editing a quiz in the Quizzes tool, a new option to Shuffle order of questions at the quiz level displays in the Quiz Questions section.

2. When creating a new section to group specific questions in a quiz, a new option to Shuffle order of questions in this section is visible in the Display Options section.
3. Once the shuffle option is selected, a shuffle icon appears next to each affected question in the quiz.
