

## April Monthly D2L Update Notification (effective 4/21/2017)

Brightspace/D2L Learning Environment 10.7.0.0

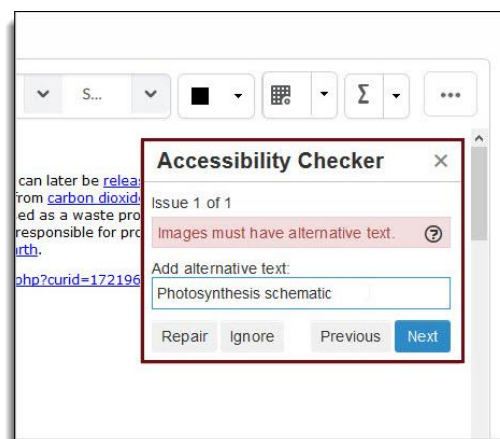

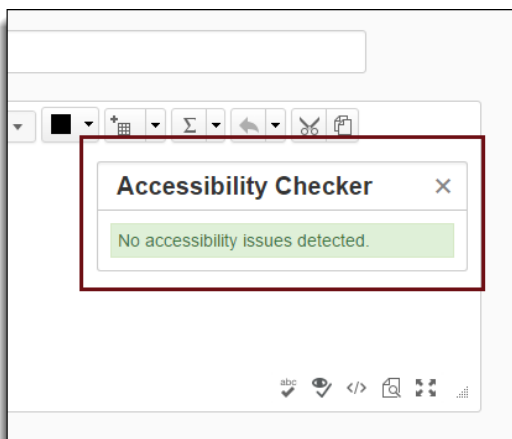

### HTML Editor

An accessibility checker is now available within the HTML editor for use within Content, Widgets, Quizzes, Assignments, Calendar, and any other tools where an instructor or student can access the editor.

The checker can be accessed by clicking on the eye with checkmark in the bottom right of the editor. After content is added to the HTML editor, a user can click the checker to ensure that the HTML page conforms to WCAG and Section 508 accessibility standards.

The checker reviews the structure of the HTML page and either indicates that there are no issues, or offers suggestions to fix identified accessibility issues.

## Quizzes:

---

"Long Answer" type question has been renamed "Written Response" in the Quiz Question Library and Add/Edit Questions area under Quizzes.
