

Create Turning Cloud Participant List from D2L Integration:

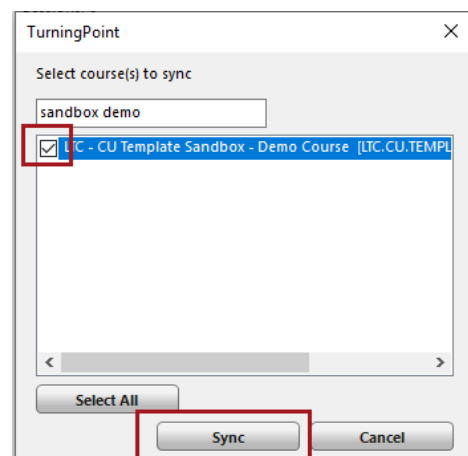

1. Open the TurningPoint App from the desktop and sign-in.
2. Access the **Manage** tab from the TurningPoint dashboard.
3. Choose **"New"** From the Course drop-down menu.

4. Choose to **Download from LMS Sync Integration** then click **Create Course**.

5. **Search** for or **Select** your course in the list of available courses; select Sync.

- The cloud icon next to the course demonstrates that the course has been synced with D2L. Use the Update button to re-sync as needed. The imported list will show you the Device ID, license (for mobile app and device) as well as student Eagle mail and Active/inactive status.

The screenshot shows the TurningPoint Dashboard interface. The top navigation bar includes 'POLLING', 'CONTENT', and 'MANAGE' tabs. The 'MANAGE' tab is active, displaying the 'Course Overview' for 'LTC - CU Template Sandbox - Demo Course'. The interface includes buttons for 'Upload Grades', 'Update', 'Edit Roster', and 'Results Manager'. A red warning banner states: 'Participants highlighted in red do not have a valid subscription. Participants must obtain a valid subscription to receive scores.' Below this is a table with the following data:

Last Name	First Name	Subscription	Account Linked	Expiration	Device ID(s)
Homan	Ava	✗	✗		
Student	LTC1	✓	✓	Oct 27, 2019	EDA8C; 111D7FFF
Student	LTC2	✗	✗		
Student	LTC3	✗	✗
